SYSTEM ENGINEER

PROFESSIONAL SUMMARY:

Creative and dedicated Systems Engineer with practical experience working with machines, electrical components, and industrial equipment. Skilled in troubleshooting, assembly, and preventive maintenance of technical systems. Motivated by a deep interest in how things operate and dedicated to learning, adapting, and improving while always delivering my best work.

PROFESSIONAL EXPERIENCE:

System Engineer | Hardware | Urban Industries Corp | Charlotte, NC 05/2023 - Present

- Maintain and administer computer networks and related environments, including hardware, system software, application software, and configurations
- Diagnose, troubleshoot, and resolve hardware, software, or other network and system issues, and replace defective components when necessary
- Perform daily system monitoring, verify the integrity and availability of all hardware and server resources, and review system and application logs

Maintenance Technician | Colgate Enterprise Corp | New York, NY 10/2019 - 11/2022

- Accepted, installed, and did preventive maintenance tests on equipment: protective relays, transfer trip, transformers and breakers
- Interpreted test results; made recommendations to engineering, operating, programming, and other personnel, based on hardware characteristics or performance
- Performed specialized tests and design work, and prepared detailed reports, drawings, sketches, logs, and records of completed tasks

Electrical Assembler | Axecon Corp | New York, NY

10/2018 - 09/2019

- Mechanically built custom enclosures and panels using panel layouts
- Wired custom enclosures and panels using wiring diagrams
- Trained and mentored new team members in different areas of production

System Administrator | Lexunder inc | New York, NY

12/2016 - 09/2018

- Monitored and documented abnormal performance of servers, workstations, and services, and maintained site topology configuration and changes
- Provided hardware and software maintenance, including replacement of defective hard drives, servers, workstations, barcode readers, printers, and digital scanners
- Utilized VMware products to manage PCs, Macs, and mobile devices by deploying software, applying updates, and enforcing profiles for compliance

EDUCATION:

Certificate in Computer Science

Retraining Program for Immigrant Engineers, Cooper Union, New York, NY

Bachelor's in Computer Science (BS)

Odessa National Polytechnic University, State University, Odessa, Ukraine

PROFESSIONAL DEVELOPMENT/AFFILIATIONS:

- Python and Data Science, NY, Cooper RPIE, 05/27/2022
